

TC4 Optional Arm Mount Supplement

10.21.04

31068 - TC4 Aluminum Rear Arm Mount, X-2.5

31069 - TC4 Aluminum Rear Arm Mount, X-2.0

In order to obtain the optimized geometry, there is a very tight tolerance between the arms and the rear transmission case on your TC4. They are especially close when using the 31068 and 31069 (X-2.5, X-2.0 blocks). In order to prevent the suspension from binding, it is recommend to trim the rear arms as shown. **DO NOT** trim away more material as this will weaken the suspension arm.
