For Immediate Release: April 3, 2012

1:10 Scale 2WD Nitro Off Road Race Truck

Official R/C Car of the LUCAS OIL OFF ROAD RACING SERIES GEICO

For many people in the RC world, nothing beats a 2-stroke nitro-breathing engine. From the sound, to the smoke, to the brutal power, nitro delivers an experience in a RC truck like nothing else can. Now you can experience that awesome nitro power in the short-course class with the SC10GT! Based on the proven GT2 platform, the SC10GT comes built and ready-to-run straight from the factory. At the heart of the SC10GT is the powerful Team Associated .18X pull-start engine with tuned exhaust system to deliver the performance.

The nitro horsepower is transferred to the ground through the externally adjustable V2 slipper clutch and the 4.09:1 ratio gearbox. A heavy-duty ball differential with lightened outdrives turns the rear wheels that are mounted with high-traction JConcepts racing tires for the ultimate grip.

The SC10GT soaks up the bumps with the four-wheel independent suspension featuring adjustable blue anodized 6061-T6 aluminum V2 coil-over shocks.

Controlling all of the action in your hands is the 2.4GHz radio system that makes it easy to drive the SC10GT right where you want it to go. The SC10GT is pure nitro fun at its best! If you're ready to step up to the nitro challenge, we have your truck waiting for you!

SC10GT RTR Specifications:

Scale:	1:10
Power:	Nitro
Length:	550mm
Width:	293mm
Weight:	2300g*
Wheelbase:	327mm
Internal Gear Ratio:	4.09:1
Drive:	2WD

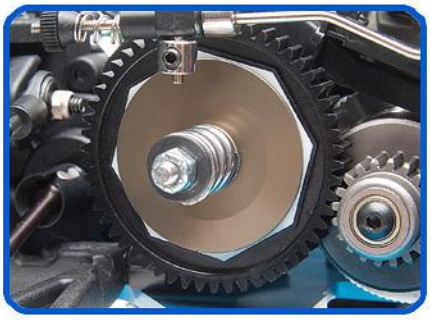
**Weight does not include fuel*

SC10GT

1:10 Scale Ready-to-Run Nitro 2WD Off Road Race Truck

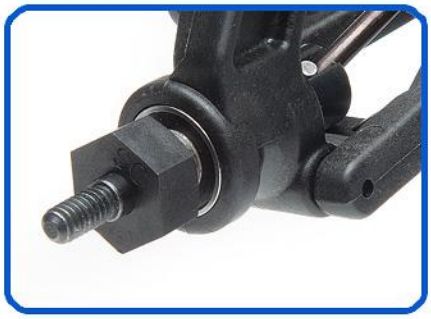
Performance-proven Team Associated .18X engine and tuned exhaust

Adjustable blue-anodized 6061-T6 aluminum V2 coil-over shocks



V2 dual disc slipper with low center of gravity transmission

High-traction JConcepts racing rear tires with KMC replica wheels



Hex drives front and rear

2.4GHz radio system

Metal-gear steering servo

Water-resistant enclosed receiver box and battery box

SC10GT RTR Features:

- Low center of gravity transmission with 4.09:1 ratio produces the ultimate in torque with proven ability to transmit all the power to the ground, which makes for ground-shaking speeds not usually seen in RTRs.
- V2 Dual disc slipper clutch.
- Modular radio tray that easily removes for cleaning and maintenance, and protects the receiver against fuel spills during pit stops.
- Optional (#89324) high-capacity 150cc fuel tank fits in standard radio tray for longer run times.
- Special tuned exhaust system, which produces a perfect balance of maximum power and efficiency.
- V2 Blue anodized aluminum shocks.
- All-new sealed battery box.
- Blue anodized aircraft aluminum chassis. Chassis design adds tremendous rigidity for the ultimate in consistency and handling.
- Radical pre-painted body shell that any pro painter would be proud to produce.
- Our proven #2918 AE .18X engine will shock customers with its power and speed.
- High-traction JConcepts™ racing rear tires for consistent handling and long life.
- Ball differential with lightweight outdrives.
- Shielded bearings throughout the truck.
- Glow igniter and fuel bottle included.
- AE logo mud flaps.

Items required for completion:

- D-size cell for igniter
- AA batteries, 12
- Slotted screwdriver
- Fuel, 20%-30% only
- Extra glow plugs recommended

Other helpful items:

- Silicone Shock Fluid (refer to online catalog for complete listings)
- Reamer / Hole Punch for body
- 8-Piece Hex Driver Set (#1655)
- Starter Box (#1750)
- Needle Nose Pliers
- Calipers or a Precision Ruler
- Green Slime shock lube (#1105)
- Cyanoacrylate glue (#1597)
- Thread Locking Compound (#1596)
