

Reedy 4600mAh 55C 14.8V Competition LiPo Battery

Reedy's innovative 4600mAh 55C 14.8V LiPo battery is a must have for the hardcore 1/8 buggy racer who seeks maximum power output and run time in a compact package.

The battery's weight makes it easier to achieve perfect left/right weight distribution while 5mm power sockets offer the same convenience and low-resistance operation that 1/10 and 1/12 drivers have enjoyed for years.

A durable hard case protects the battery from damage while three 2mm balance ports allow for balance charging using the included balance charge harness. Two 5mm sockets are also included.

Special Features:

- Durable hard case
- Low-resistance 5mm sockets
- Light weight lowers CG for improved handling and weight distribution
- Unique configuration allows for efficient wiring
- Charge harness and 5mm ESC plugs included
- Competition proven
- ROAR approved

Perfect for:

- Hardcore 1/8 eBuggy and eTruggy racers
- Enthusiasts who want race level performance
- Customers who demand high quality from a trusted brand
