

## Reedy LiPo Battery Weight Set

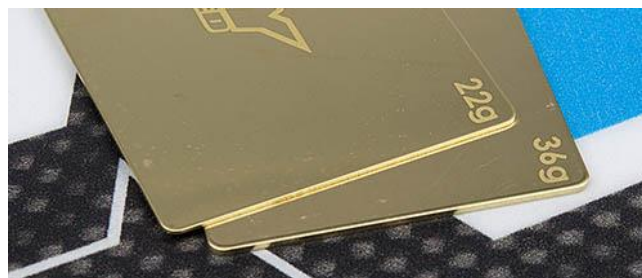

After making some updates, the Reedy LiPo Battery Weight Set is back in stock and shipping! These weights have been modified (now 22g and 36g) with the value laser etched onto each piece along with the world-famous Reedy Powered logo. These weights can be used together or separately under your low-profile shorty LiPo battery to add ballast and/or lower the vehicle's CG for improved handling.

Each set is precision cut from brass and contains one .5mm (22g) weight and one 1mm (36g) weight, which can be used together or separately.
