

For Immediate Release: January 14, 2019

New! Reedy Sonic S-Plus 25.5 Motor

Reedy's Sonic S-Plus motor is now available in a version that meets ROAR's unique guidelines for 25.5 turn motors typically used in Formula and VTA racing classes!

Maximum power output is achieved thanks to near-minimum resistance measurements and a high-strength balanced rotor. In addition to increased power output, reduced weight improves handling and chassis-turning flexibility. Additionally, the motor's length has been shortened by more than 2mm, which aids left/right balance and moves mass towards the center of the chassis.

Finally, precision stainless steel ball bearings have been fitted to accommodate high RPM loads with exceptional efficiency and reliability.

Visit www.reedypower.com for a complete list of tuning rotors, replacement/option parts and detailed specifications.

Features

- CNC-machined lightweight can
- Low-resistance stator
- High-strength, balanced rotor
- Silver-plated solder tabs
- Precision ball bearings
- Optimized air cooling
- Adjustable timing
- Competition proven
- ROAR 25.5 specs

Specifications

Cells	1-2S LiPo
Diameter (mm)	35.8
Length (mm)	50.4
Shaft Diameter (mm)	3.15
Weight (g)	166
