

WolfPack Lithium Polymer Batteries

Reedy's WolfPack LiPo batteries meet the performance demands of both the casual enthusiast and the club racer. Generous discharge capabilities increase overall power and top speed while high capacities extend run times far beyond what is capable with NiMH batteries or lower quality LiPo batteries.

Each battery features Reedy's molded hard case for maximum crash protection in sizes that fit the most popular car configurations. High quality cell manufacturing and construction techniques result in reliable operation and maximum cycle-life.

Unlike some brands that utilize power-robbing universal plugs, Reedy's WolfPack LiPo batteries come equipped with beefy silicone wires and a low-resistance T-plug connector. An integrated balancing harness with a JST-XH connector is included.

Special Features:

- Constructed with cells manufactured in a ISO 90001:2000 quality certified factory
- Pre-installed low-resistance T-plug connector
- Low resistance flexible silicone wires or competition style 4mm socket connectors
- Protective hard cases in stick and brick configurations
- Packaged in a protective cardboard box with complete instruction manual
- Industry leading customer service and product support including a 30-day warranty

Perfect for:

- First time R/C users
- Experienced hobbyists who want an economical entry into LiPo batteries
- Club racers who want excellent performance at a reasonable price
- Pro racers who want to fine tune their car's power output and weight distribution
- Anyone who seeks powerful, long-lasting, and reliable performance
